

# SPEEDY SEEDLINGS

Authors: Tagasa (226081) and Marino(224103)

## **GAME DESCRIPTION**

Speedy Seedlings is a simple multiplayer collecting game wherein players compete against each other as seedlings race to grow. In an enclosed environment where Elemental Sprites wander around, a seedling must collect enough in order to successfully grow.

## **GAME MECHANICS**

Each player will individually spawn their own Seedling object inside the enclosed play area. Elemental Sprites will then spawn randomly and move around the area. Players must chase and collide with an Elemental Sprite to collect them. The first player to collect the required number of Sprites will win the game.

## **HOW TO PLAY**

1. Initialize the Game Server
2. Run the Game Client in each Player's designated devices
3. Once all players have connected the game windows will be displayed, and the game will automatically start.
4. Movement
  - a. Player 1 (First player to connect to the Game Server)  
Use Arrow Keys (Up, Down, Left, Right) to move around the play area and chase the Elemental Sprites
  - b. Player 2 (Second player to connect to the Game Server)  
Use W,A,S,D Keys to move around the play area and chase the Elemental Sprites.
5. The Player who collects the required number of Elemental Sprites before the other will win the game.
